

THIN SILICONE MEMBRANE for glass lamination vacuuming with EVA PVB SGP or TPU

SIZE: 2MM THICKNESS*2.95METER width*ANY LENGTH,
SIZE: 1MM THICKNESS*2.95METER width*ANY LENGTH,

Hardness is 40 Shore A
Tensile Strength is more than 9.5MPA
Tearing Strength is more than 37N/mm
Elongation is more than 750%
Long Run Temperature is more than 220°C
EVA Resistance is Strong
Normal Using Life is more than 3000 cycles
Appearance is Both sides smooth

Made of self-developed special formula to highly improve the properties of silicone sheet like:
Great Acid resistance
Chemical agents resistance,
High temperature resistance,
Great tensile strength
Great tearing strength
Highly prolong useful life

If you want to order, please feel free to send us email, and you may expect answers in 24 hours.
